Summary

Applied Mathematics graduate and Senior Consultant specializing in AI agent development and data-driven solutions for clients across Latin America. Builds and delivers end-to-end analytical products, from machine learning models to Agentic AI-powered solutions, with a track record of translating complex technical capabilities into measurable client outcomes. Consistently entrusted with expanded responsibility across engagements in energy, hospitality, real estate, financial services, and auditing.

Education

Instituto Tecnológico Autónomo de México (ITAM) – B.S.
Applied Mathematics, 2019–2024

Key Areas of Expertise

AI Agent Development, GenAI Solutions, Machine Learning, Statistical Modeling, Time Series Analysis, Numerical Optimization, Strategic Analytics

Professional Experience & Projects

Deloitte, AI & Data, Strategy & Advanced Analytics, Mexico City | Senior Consultant | May 2024 - Present

Developed analytical models, software tools, financial projections, and strategic deliverables that informed C-suite decision-making. Leveraged data science expertise and business/strategy know-how to deliver analytics-driven solutions tailored to client needs.

- Developed a Python tool to automate vehicle sales validation across 200+ dealerships of six brands, reducing process time by 75% and eliminating human error, generating annual savings of \$1M+ MXN.
- Built a full-stack AI agent solution for a major bank encompassing automated regulatory compliance reporting and competitive/financial analysis, with a validated business case projecting 91% reduction in execution time and 16% to 39% in annual cost savings. Skills: API development, context

engineering, prompt engineering, Agent Orchestration.

- Developed an AI-powered commerce agent using AWS AgentCore and Strands, featuring intelligent shopping list matching and product recommendations. Awarded 3rd place in an AWS partner hackathon.
- Designed a 10-year growth plan for a hotel group valued at \$1B+ USD, including financial valuation and strategic initiatives, capturing an additional present value of \$100M+ USD.
- Gained cross-industry experience in energy, hospitality, real estate, and auditing sectors across Latin America.
